

30 gennaio 2020 - Ore 10:00

Aula 05 Edificio U8

Via Cadore 48, Monza

Dipartimento di Medicina e Chirurgia

---

## Esame finale per il titolo di DOTTORATO in NEUROSCIENZE 32° ciclo

---

**Fulvio Da Re**

An MRI-based analysis of the longitudinal progression of atrophy in amnesic and non-amnesic phenotypes of Alzheimer's disease

**Greta Forcaia**

Multifunctional Liposomes modulate Purinergic Receptor-induced Calcium Wave in Cerebral Microvascular Endothelial Cells and Astrocytes

**Giulia Fumagalli**

The role of Neurofilament Light Chain as a serum biomarker in chemotherapy-induced peripheral neurotoxicity rat models

**Serena Giurgola**

Plastic modulation of the body metric representation: neurophysiological and behavioral evidence

**Eleonora Pozzi**

Oxaliplatin-induced peripheral neurotoxicity in mouse models: different treatment schedules and focus on oxidative stress

**Erica Varoli**

TMS-EEG: a promising tool to study the cathodal tDCS effects on cortical excitability
